

Page 1: PDF Engine Verification

Test 1: CSS Flexbox Layout (Modern Layout Opt-in)

If AllowModernLayout is working, the boxes below should align side-by-side in a row.

Flex Item A Flex Item B (wider)

Test 2: Rounded Borders (border-radius)

If border-radius is supported, the corners of this box should be rounded. Otherwise, they will be sharp squares.

Test 3: RGBA Transparency / Opacity

If alpha/opacity is supported, this box should have a light semi-transparent red background and a semi-transparent blue border. If ignored, the background will be a solid dark red and the border will be opaque blue.

Page

2 (via CSS3 break-before)

If CSS3 break-before is supported, this header will start on Page 2. Otherwise, it will remain on Page 1.

Page

3 (via CSS2 page-break-before)

This header uses CSS2 page-break-before and should start on a new page regardless.
